JK Portal — Team Testing Guide

Sep 25, 2026 · @Que Sera

What the website is

The Jharkhand Societal Innovation & Collaboration Platform lets citizens report local problems, and universities and industry solve them together. It is built for the Government of Jharkhand, Dept. of Higher & Technical Education (SIH 2026, PS 26043).

Think of it as a relay race with four legs:

1. **Citizens and panchayats** report a problem (water, roads, health, farming…) with photos, location and voice notes.
2. **District officers** review it. AI suggests a category, priority score and possible duplicates; the officer accepts, overrides or rejects.
3. **Universities (faculty and students)** adopt validated problems, form project teams, and deliver prototypes through milestones.
4. **Industry CSR partners** fund projects. **Field verifiers** inspect on site and confirm the real-world impact. **Admins** watch everything statewide.

There are 8 roles. Each sees a different dashboard after login, so every tester must log in as more than one role to see the full picture.

Role	What they do on the site
Citizen	Submit problems, upload evidence, track status, manage privacy rights
District Officer	Review the district queue, check AI suggestions, validate or reject
Student	Join teams, work on tasks, submit deliverables
Faculty	Create projects, assign student tasks, review milestones
University Dean	Adopt challenges for the institution, allocate labs, approve agreements
Industry (CSR)	Browse validated projects, pledge funding, sign IP agreements
Field Verifier	Submit geotagged inspections and lab test results

Role	What they do on the site
Super Admin	Statewide analytics, district heatmaps, audit logs, user governance

Before you start

Every demo account uses the password **password123**. Use the local build or the shared test URL, never production.

Where to test

- Local: run `docker-compose -f docker-compose.dev.yml up -d --build`, then open http://localhost:8008
- Shared test URL: ask the project lead for the current ngrok link. If ngrok shows a warning page, click **Visit Site**.
- API docs (for technical testers): add `/docs` to the URL. Health check: `/health`.

Demo accounts (password `password123` for all)

Role	Email	Lands on
Citizen	citizen@jharkhand.gov.in	Citizen dashboard
PRI (Gram Mukhiya)	pri.angara@jharkhand.gov.in	Citizen dashboard, with an "on behalf of" banner
District Officer (Ranchi)	officer.ranchi@jharkhand.gov.in	Admin dashboard, Ranchi data only
Field Verifier	verifier.ranchi@jharkhand.gov.in	Admin dashboard, Ranchi data only
State Admin	admin@jharkhand.gov.in	Admin dashboard, all 24 districts
University (BIT Mesra)	university@bitmesra.ac.in	University dashboard
Faculty Mentor	faculty@bitmesra.ac.in	Faculty portal
Student	student@bitmesra.ac.in	Student portal
Industry (Tata Steel)	industry@tatasteel.com	Industry partner portal

The officer, verifier and PRI accounts only exist after running the flagship seed: `python -m backend.app.services.seed_flagship_demo`. Ask a developer to run it once before testing starts.

Resetting demo data

A developer can wipe and re-seed everything with `POST /demo/reset` (only works when `DEMO_MODE=true`). Agree on a reset time with the team first, because it deletes everyone's test data.

Browsers and devices to cover

- Desktop: Chrome, Firefox, Safari (Edge if available)
- Mobile: one Android phone (Chrome) and one iPhone (Safari), portrait and landscape
- One slow connection: Chrome DevTools, Network set to Slow 3G

Split the team so each person owns one or two roles, then swap roles halfway through.

How the full site works

Every problem ("challenge") moves through a fixed set of statuses, and each status can only be changed by certain roles. Once you understand this path, you understand the site.

Submitted → AI Analysis → Under Review → Validated → University Assigned → Team Formed → Solution Proposed → Approved → Prototype → Field Testing → Deployment → Field Verification → Resolved → Impact Audited → Closed

Side exits: an officer can mark a challenge **Needs More Info** (goes back to the citizen), **Duplicate**, **Rejected** or **Paused**. A status can never skip ahead illegally; the site should show an error if someone tries.

Who moves each step

Stage	Who acts	Where on the site
Submitted	Citizen / PRI	Citizen dashboard, Report a Challenge
AI Analysis	System (automatic)	Citizen sees the AI Analysis screen after submitting
Under Review to Validated	District Officer	Admin dashboard, Challenge Management
University Assigned	Officer / Admin assigns; University accepts or declines	University dashboard, Assignment Inbox

Stage	Who acts	Where on the site
Team Formed	University / Faculty	Create Project, then Project Dashboard (add members, milestones, tasks)
Solution Proposed to Approved	Faculty proposes; officer/admin approves	Project Dashboard
Prototype, Field Testing, Deployment	Students do tasks; Faculty approves milestones	Student portal, Faculty portal
Funding (runs alongside)	Industry pledges CSR money, accepts IP consent	Industry portal, Browse Projects
Field Verification	Field Verifier	Admin dashboard (geotagged evidence, lab results)
Resolved to Closed	Admin; citizen rates satisfaction	Admin dashboard, Impact Dashboard; citizen's Track Solution

Main screens by role

- **Common**: Splash, Onboarding, Register, Login, OTP, Forgot Password, Profile, Notifications, Notification Preferences, Accessibility settings, English/Hindi switch.
- **Citizen / PRI**: Dashboard, Report a Challenge (photos, location, voice note, offline draft), AI Analysis, Challenge Submitted, My Challenges, Challenge Details, Nearby Challenges, Track Solution, Privacy & My Data.
- **Officer / Verifier / Admin**: Admin dashboard, Challenge Management, Analytics & Statewide Reports, Jharkhand Map (district heatmap), Impact Dashboard, Export CSV.
- **University**: Dashboard, Assignment Inbox, Challenge Discovery, Create Project, Project Dashboard.
- **Faculty**: Mentorship Invitations, Mentored Projects, Milestones Pending Approval (Approve / Request Revision).
- **Student**: Project invitations, Assigned Tasks, Submit Deliverable, skills profile.
- **Industry**: Available Projects, Browse University Projects, Active Partnerships, Pending IP Consents, funding tranches (Held / Released).

What to test, and how

Start with the end-to-end run (E2E) so everyone sees the whole journey, then split up and do the role checks. Quote the test ID (for example C-03) in every bug report.

E2E: one challenge from report to closure (do this together, about 45 minutes)

One person shares their screen. Use two browsers (or one normal + one private window) so two roles can be logged in at once.

1. **Citizen** logs in and reports a new problem in Ranchi district, with a photo and a short title like "Hand pump broken in Angara village". Write down the tracking code.
2. **Citizen** checks the AI Analysis screen: category, priority, possible duplicates.
3. **District Officer** logs in, finds the challenge in Challenge Management, reviews the AI suggestion, and validates it.
4. **Officer or Admin** assigns it to BIT Mesra.
5. **University** accepts it in the Assignment Inbox and creates a project.
6. **University / Faculty** adds a student, a milestone and a task on the Project Dashboard.
7. **Student** accepts the invitation, opens the task and submits a deliverable with a file.
8. **Faculty** approves the milestone (try Request Revision once first).
9. **Industry** finds the project in Browse Projects, pledges funding and accepts the IP consent.
10. **Field Verifier** submits a geotagged inspection with a before/after measurement.
11. **Admin** marks it resolved; **Citizen** opens Track Solution and sees each step with dates.

Pass when: the status updates at every step, each role gets a notification, and the citizen's timeline matches what happened.

Citizen and PRI

ID	What to check	How	Expected result
C-01	Register and log in	Register a new account; log in; log out; log back in	OTP / verification works; you land on the citizen dashboard
C-02	Wrong password	Log in with a bad password 5+ times	Clear error; after repeated failures, you are rate-limited
C-03	Report a challenge	Fill all fields, add photo, choose district and block, submit	Tracking code shown; challenge appears in My Challenges as Submitted
C-04	Required fields	Submit with title or district empty	Form blocks submission and shows which field is missing
C-05	Location outside Jharkhand	Pick a map point outside the state	Rejected with a clear message

ID	What to check	How	Expected result
C-06	Voice note	Record a 10-second voice note and submit	Note attaches and plays back on Challenge Details
C-07	Large or bad file	Upload a file over 25 MB, and a .exe renamed to .jpg	Both rejected with a clear message; no crash
C-08	Offline draft	Turn off Wi-Fi mid-form, fill it in, close the app, reopen	Draft is restored; it submits once when back online, with no duplicate
C-09	Needs More Info	After an officer asks for more info, add details and resubmit	Challenge returns to review; citizen gets a notification
C-10	Nearby Challenges	Open Nearby Challenges	Shows other challenges near you on the map/list
C-11	Track Solution	Open a challenge that is in progress	Timeline shows each status with dates
C-12	Privacy & My Data	Download my data; correct your phone number	JSON download contains your data; correction is saved
C-13	PRI banner	Log in as PRI and report a challenge	"Submitting on behalf of" banner shows the panchayat

District Officer, Field Verifier, State Admin

ID	What to check	How	Expected result
G-01	Queue shows only own district	Log in as Ranchi officer	Only Ranchi challenges appear
G-02	Cannot act on another district	Try to open or validate a Dhanbad challenge (e.g. from a shared link)	Blocked with a permission error
G-03	AI review	Open a challenge's AI analysis	Category, priority score, confidence and reasons are shown
G-04	Override AI	Change the category or priority, add a reason	Change saves; override is recorded in the history
G-05	Each decision	Validate one, reject one, mark one duplicate, one Needs More Info	Status changes; citizen is notified each time

ID	What to check	How	Expected result
G-06	Illegal jump	Try to move a Submitted challenge straight to Resolved	Not allowed; clear error
G-07	Assign to university	Assign a validated challenge to BIT Mesra	Appears in the university's Assignment Inbox
G-08	Field verification	As verifier, submit inspection with photo, GPS and lab values	Evidence saved and visible on the project
G-09	Statewide view	Log in as State Admin	Data from all districts; heatmap on Jharkhand Map
G-10	Analytics numbers	Compare dashboard counts with what you created today	Counts go up by the right amount
G-11	Export CSV	Click Export CSV	File downloads and opens in Excel with correct columns
G-12	Impact Dashboard	Open Impact Dashboard, click Refresh Metrics	Figures load; resolved challenges are counted

University, Faculty, Student

ID	What to check	How	Expected result
U-01	Accept an assignment	University: Assignment Inbox, then Accept	Challenge moves to University Assigned
U-02	Decline an assignment	Decline with a reason	Goes back to the officer; reason is visible
U-03	Challenge Discovery	Browse and filter validated challenges	Filters work; only validated challenges show
U-04	Create project	Create a project with team, milestones and budget	Project Dashboard opens with correct details
U-05	Add milestone and task	Add Milestone, then Add Task for a student	Student sees the task in their portal
F-01	Mentorship invite	Faculty: accept one invitation, decline another	Accepted project appears under Mentored Projects

ID	What to check	How	Expected result
F-02	Approve milestone	Approve a submitted milestone	Status becomes Approved; student is notified
F-03	Request revision	Request Revision with feedback	Student sees the feedback and can resubmit
S-01	Project invite	Student: accept an invitation	Project appears under My Engineering Projects
S-02	Submit deliverable	Open a task, attach a file, submit	Task shows as submitted; faculty sees it pending review
S-03	Remove attachment	Attach a file, remove it, attach another	Only the final file is submitted
S-04	No access to others	Try to open a project you are not a member of	Access denied

Industry (CSR)

ID	What to check	How	Expected result
I-01	Browse projects	Browse University Societal Projects	Only approved or validated projects are listed
I-02	Pledge funding	Offer a CSR grant on one project	Appears under Active Partnerships; university is notified
I-03	IP consent	Accept a Pending IP Consent	Consent status becomes Accepted for all parties
I-04	Funding tranches	Check Held vs Released amounts after a milestone is approved	Amounts update correctly

Access control (every tester, for their role)

ID	What to check	How	Expected result
A-01	Wrong-role pages	While logged in as Citizen, paste an admin page URL	Blocked or redirected; no admin data visible
A-02	Logged out	Log out, press browser Back	You cannot see private pages
A-03	Session expiry	Leave the tab idle for over an hour, then click something	Asked to log in again, with no crash
A-04	Forgot password	Use Forgot Password	Reset works; old password stops working

Checks on every screen

Run these on each screen you visit, whatever role you are testing.

ID	Area	How to check	Expected result
X-01	Hindi / English	Switch language from the top bar on every screen	All text changes; nothing overlaps, gets cut off, or stays in English
X-02	Text size	Accessibility settings, set largest text size	Text grows; buttons and forms stay usable, no overlap
X-03	High contrast	Turn on high contrast	Everything stays readable, including status badges and charts
X-04	Screen reader	Turn on VoiceOver (Mac/iPhone) or TalkBack (Android); move through a form	Buttons and fields are read with sensible names
X-05	Keyboard only	On desktop, use only Tab / Enter to report a challenge	You can reach and use every control
X-06	Mobile layout	Open each screen on a phone, portrait and landscape	No sideways scrolling; buttons are easy to tap
X-07	Slow network	DevTools, Slow 3G; load dashboards and submit a form	Loading indicators show; no double submissions

ID	Area	How to check	Expected result
X-08	No network	Turn off Wi-Fi	Offline banner appears; site recovers when back online
X-09	Empty states	Log in as a role with no data yet	Friendly "nothing here yet" message, not a blank page or error
X-10	Branding	Look at headers and colours	Government of Jharkhand branding, consistent green theme
X-11	Speed	Time the first load and each dashboard	First load under about 5 s on normal Wi-Fi; dashboards under 3 s
X-12	Errors	Watch for red error boxes, blank white screens, or endless spinners	None; any error message is in plain language

Reporting bugs

One bug per report, with the test ID and a screenshot. A developer should be able to reproduce it without asking you anything.

Severity

Level	Meaning	Example
Critical	Blocks the main journey, loses data, or leaks data	Citizen cannot submit; officer sees another district's data
High	A feature is broken but there is a workaround	Export CSV fails; voice note won't play
Medium	Works, but wrong or confusing	Wrong count on dashboard; text untranslated in Hindi
Low	Cosmetic	Misaligned icon; typo

Bug report template (copy this)

```
Test ID: C-03
Title: Submit button does nothing when a photo is attached
Severity: Critical
Role / account: citizen@jharkhand.gov.in
Device / browser: iPhone 13, Safari
Language: Hindi

Steps:
1. Log in as citizen
2. Report a Challenge, fill all fields, attach a 3 MB photo
3. Tap Submit

Expected: tracking code shown
Actual: nothing happens, no error
Screenshot / video: (attach)
Time it happened: 25 Sep 2026, 14:20
```

Where to log: GitHub Issues on the project repo, with the label `testing`. Mention a Critical bug in the team chat straight away as well.

Tips

- If a page looks wrong, refresh once. If it is still wrong, report it.
- Always write down the tracking code of any challenge you create.
- Don't run `/demo/reset` yourself; ask the lead.
